
WHY THE PLUMBING INDUSTRY'S ELITE CHOOSE TO EARN THE CPD CREDENTIAL

"The CPD certification will add value to your resume and your company."

That's according to Sarah A. Balz, PE, CPD, GPD, LEED AP, who is one of hundreds of plumbing industry professionals who has recognized the professional benefits of the Certified in Plumbing Design (CPD) credential offered by the American Society of Plumbing Engineers (ASPE). Yet the CPD doesn't just boost your own career—it also brings value to your company by reflecting the leadership and advanced design skills of the firm's employees.

SET YOURSELF APART

The CPD is the only international credential program in the plumbing engineering field, and those who maintain the designation are considered to have the highest level of skills in the design and specification of plumbing systems. Employers, clients, and your peers in the industry will immediately appreciate your achievements when they see the CPD designation after your name.

With CPD on your LinkedIn profile, business card, or resume, employers instantly know that you are in the top tier of plumbing engineers, and many employers are quick to reward employees for their accomplishments in achieving and maintaining the credential. Layne Andrew Micek, CPD, GPD, says that "the CPD has allowed me to progress in my company in a rather short time."

Also, the professional recognition afforded by the CPD can help accelerate your career as compared to those without the credential. "The CPD reflects competency in plumbing design and professionalism, and sets one apart from others in the industry, whether it is competing for a project with an owner, architect, or contractor, or competing for promotions in your employment," says Bradley T. Gettel, CPD, GPD, LEED AP.

THE GREATEST HIDDEN BENEFIT

Why are CPDs known to have the most

advanced skills? Due to the recertification requirements, CPDs are continually attending training programs so they are always the first to know about new techniques, methods, and products. "The continuing education requirement for my CPD recertification keeps me on a monthly schedule of training to stay fresh and up to date on new plumbing technologies," says Nikki R. Probert, CPD, GPD.

In fact, many CPDs say that the recertification requirement is one of the greatest hidden benefits of the program, in that it forces you to stay at the forefront of the industry through continuing education. "It is worth the time and effort on how it impacts my career," Gettel says.

ADD VALUE TO YOUR COMPANY

In addition to the CPD credential enhancing your career, it also strengthens your company's image in the increasingly competitive MEP industry. When potential clients see the CPD after your name, they know your company is dedicated to hiring and supporting the best talent in the profession. When you study for the CPD exam and stay educated through ongoing training, you bring more value to the services your company offers.

"Just studying for the exam itself is a great way to get exposure to all of the many aspects of the plumbing design industry. The CPD certification will add value to your resume and your company," Probert says.

Micek agrees: "The CPD shows that you are knowledgeable in the industry and can make the decisions necessary to provide the client with a great design for their building."

HOW CAN YOU JOIN THE ELITE?

The CPD exam is held at online testing centers around the world every year.
