UPONOR CHLORFIT® SCHEDULE 80 CORZAN® CPVC

Engineered for commercial domestic water, Uponor ChlorFIT® Schedule 80 Corzan® CPVC delivers exceptional durability and reliability, providing cost and labor efficiencies while enhancing sustainability in all commercial projects.

Strength and Quality for Commercial Plumbing

Engineered to handle the demands of commercial plumbing, Uponor ChlorFIT® Schedule 80 Corzan® CPVC (Uponor ChlorFIT) is widely accepted in the industry. Backed by an industry-leading warranty, contractors can trust Uponor to keep their projects on budget and on schedule, avoiding costly delays and keeping reputations intact.

Ideal Applications

- Multifamily, hospitality, and education buildings
- New construction, renovation, and retrofit projects
- Hot and cold potable water distribution
- Low-temperature hydronic piping
- Matched with Uponor AquaPEX® for a complete, hybrid system

A Complete Piping Solution from ½" to 8"

Compatibility Matters

Combining the flexibility of AquaPEX in sizes from ½" to 2" - 3" along with Uponor ChlorFIT in sizes up to 8" delivers the ultimate hybrid piping solution for installation efficiencies, jobsite safety, and lasting performance.

25-Year System Warranty

Comprehensive coverage for Uponor PEX-a, ProPEX®, and Uponor ChlorFIT® Schedule 80 Corzan® CPVC piping systems when used as a system with other Uponor components, and 25 years for Uponor ChlorFIT CPVC products with other Uponor components.

Enduring Performance

Made from durable Schedule 80 Corzan® CPVC, Uponor ChlorFIT stands up to the 10 most common chemicals that can degrade metals, providing consistent performance even in continuous recirculation systems with chlorinated water up to 140°F.

Corzan® is a registered trademark of Lubrizol Advanced Materials, Inc.

MADE FOR TOMORROW

ProPEX® LF Brass to Schedule 80 CPVC Adapters

Streamline your hybrid system with new, innovative adapters for easy transitions from Schedule 80 CPVC to ProPEX®, eliminating extra steps and connections. Available in ½" to 3" from the brand you trust.

See more on the back page.

HOW THE FUTURE FLOWS

- NSF/ANSI Standard 14
- NSF/ANSI Standard 61
- ASTM E84* ½" - 6"
- ASTM F493
- ASTM F441
- ASTM F1970

A Comprehensive Offering of Schedule 80 Corzan® CPVC Products

Designed and Manufactured for Trusted, Reliable Service

Chlorine Resistance

Due to its manufacturing method, Uponor ChlorFIT is naturally resistant to the effects of chlorine and chlorine dioxide used to disinfect potable water supplies, providing longer service life for piping systems.

Jobsite Efficiencies

Uponor ChlorFIT is lighter in weight than metallic options, while maintaining durability, reducing the physical burden on installers, speeding installations, and increasing jobsite efficiencies.

Stronger Performance

Over time, metal piping systems corrode inside and out, requiring costly repairs and repipes. An all-polymer Uponor PEX-a and Uponor ChlorFIT piping system resists corrosion for a lifetime of consistent reliability.

Excellent Durability

Manufactured from high-quality raw materials to provide industrial-grade strength, the Uponor ChlorFIT piping system is designed to provide decades of reliable service.

Plenum Rated

Uponor ChlorFIT in ½" to 6" sizes has the ICC-ES PMG E84 25/50 plenum fire rating per ASTM E84-15B / UL 723 25/50 for confidence in commercial piping design and construction.

Secure Connections

Rely on trusted solvent-weld connections and ProPEX transitions designed to withstand commercial environments and meet installation requirements.

Together, we are leading with water. To learn more, visit [uponor.com/ChlorFIT](https://www.uponor.com/ChlorFIT).
