

## KITTING SOLUTIONS

# Improve commercial construction productivity

Uponor kitting offers a solution that improves installation efficiencies and consistency, lowers labor and material costs, and enables better management of project schedules.

According to MCAA, only **32%** of labor time is dedicated to **direct installation**.

## Value-added service

- › Customized, coordinated packaging with all essential ProPEX® fittings, rings, transitions, valves, stub outs, supports, and other components in individual kits labeled by room (does not include pipe)
- › Kits include a materials list, plan view, and 3D isometric drawing for a clear installation plan
- › Scheduled delivery with notification and tracking by level or phase directly from Uponor to eliminate job-site clutter

## Ideal applications

- › Buildings with high repeatable room types, such as apartments, hotels, dormitories, assisted-living centers, and hospitals
- › In-unit piping with trunk and branch or Uponor Logic with ProPEX engineered polymer (EP) multiport tees
- › All types of construction, including wood or metal frame, metal or post-tension decking, and in-slab or overhead pipe routings

“We were completing rough-ins for five to six apartments daily before Uponor kitting. Now, we’ve been able to increase our productivity another two to three units per day.”

› Jared Hudalla, plumber, Major Mechanical

### Increase efficiencies

Install faster, easier, and more consistently with customized kits for your specific project.

### Save money

Reduce labor costs by eliminating unnecessary material purchasing or handling.

### Reduce waste

All necessary components are right in the kit, significantly reducing job-site waste.

### Meet deadlines

Access to the full Uponor catalog offering and warehouse avoids delays due to in-stock distribution gaps.
